PROFESSIONAL SUMMARY

Software engineer with **4 years of professional experience** building, integrating and running business applications in production for warehousing, retail, insurance and healthcare. I work daily in **Python (FastAPI)** and on **Microsoft Azure**, connect systems through **REST APIs, webhooks and background queues**, and add **AI/LLM capabilities** where they create real value. My development workflow is **AI-assisted end to end with Claude Code**: implementation, tests, refactoring and code review. As founder and technical lead of ELROI Labs I own delivery from design to deployment and production support.

TECHNICAL SKILLS

Backend	Python, FastAPI, SQLAlchemy, Alembic, Laravel (PHP), JWT + 2FA	Integration	REST APIs, webhooks, background job queues, SOAP, Shopify Admin API, Magento, Dynamics 365, WhatsApp
Cloud / Ops	Microsoft Azure (App Service with WebJobs, Functions, VMs, Storage, Azure SQL), Docker, Linux, CI/CD	Data	SQL, MySQL, SQLite, relational data modeling, versioned migrations
AI / LLMs	OpenAI (Vision, Responses API), structured outputs, LLM agents with tool calling, MCP servers	AI-assisted	Claude Code in daily development, Git/GitHub branching, pull requests and code review
Frontend	React 18, TypeScript, Vite, Tailwind CSS	Domains	Warehouse management, retail inventory & orders, food production & distribution, insurance & healthcare
Languages	Spanish (native) · English intermediate (B1–B2): daily technical reading and written communication		

PROFESSIONAL EXPERIENCE

Full-Stack Developer2024 — Present

Nuts Marketing

Integration middleware between Shopify stores and Microsoft Dynamics 365 ERPs, plus the Shasa (Mexico and US) and Hypsters platforms. Stack: Laravel, Laravel Nova, Filament, Shopify Admin API (GraphQL and webhooks), SOAP and Azure App Service with WebJobs.

- **Macadamia (internal project):** Shopify ↔ Dynamics 365 Finance & Operations middleware for a retailer: orders, customers, store pickup by location, payment mapping and Shopify ↔ middleware ↔ F&O reconciliation reports.
- **El Asturiano:** Dynamics 365 Business Central + LS Central over SOAP/XML; receives Shopify webhooks and syncs inventory with scheduled jobs.
- **Shasa (Mexico and US) and Hypsters:** Shopify and Magento integrations for catalogs, inventory, orders and customers; Apple Wallet passes and gift cards.
- **Maratón:** digital development for the classic Maratón trivia game. **Coco (internal project):** new Laravel + Nova app on Azure App Service.

Full-Stack DeveloperPresent

Tangramx

Enterprise applications for logistics operators, insurers and healthcare institutions. Primary stack: Python / FastAPI.

- Compass WMS — Warehouse Management System

Warehouse operations and client portal (internal e-commerce) · 21 commits

 - Built the Administrator preview mode for the Client Portal and fixed folio assignment in the order flow.
 - Removed a hidden pagination ceiling by implementing **true server-side pagination** for large datasets.
 - Implemented the product gallery with image reordering and fixed a **race condition** in multi-file upload; resolved session and authentication bugs.
- Vitase / Paciente Integral — AI document processing

Medical records and claims management for insurers (Jalisco Health Services) · 26 commits

 - Integrated **OpenAI Vision** for OCR of Mexican national ID cards (INE), replacing the previous engine.
 - Built a **deterministic validation layer** on top of the model output for CURP (check digit, homoclave, special cases) and **evaluated it against ground truth**: 25 real ID cards, 100% name accuracy.
- ATC · ATCSMART

Account-statement processing and insurance-claims systems (FastAPI)

 - Fixed incorrect discount detection and an off-by-one date shift in the statement parser; added Excel exports segmented by insurer and hospital; wrote the local setup guides.

Software, integration and applied-AI studio. I lead technical operations and deliver projects from design to production support.

OS CRM — in production

CRM for leads, pipeline, multichannel follow-up, clients and projects (Laravel, React)

- Designed, deployed and maintain the platform in production, built with an **AI-assisted workflow (Claude Code)** and covered by automated feature tests.
- **WhatsApp integration** for sending text and media from the CRM, logged to each lead’s history; queued notifications and task reminders.
- **LLM integration:** an MCP server with 23 tools so AI assistants can work with leads, tasks and reports under the user’s permissions, with full audit logging and human approval before outbound messages; LLM agents with structured outputs; a custom OpenAI-compatible model gateway with fallback.

SYSTEMS & TEACHING

Institutional Systems Programmer & Teacher

Present

Instituto Tecnológico de La Paz

- **Programmer** of the Tec’s institutional systems.
- **Teacher** in the final semester of the software development programs; as part of teaching, training on applied AI for business.

PREVIOUS EXPERIENCE

- **Giro26** (2023–2024) — Full-Stack Developer: financial ERP, hexagonal architecture and SQL optimization.
- **Hi-G** (2024–2025) — Web & Mobile Developer: Hi-G, Karol G’s app, with Flutter, Firebase, TypeScript and Web3 integrations.

EDUCATION

B.S. in Computer Systems Engineering — Instituto Tecnológico de La Paz. Software Development specialization: web development, mobile apps and video games.

PERSONAL PRODUCTS

NopalGreen

Operations platform for tortilla producers: POS, production, inventory, delivery and reporting.

AVT

My own multitenant SaaS for land sales: users, plots, zones, maps and commercial operations.

PMCRM

Workspace for managing projects, files, notes, clients and collaboration from a single platform.
